

I am becoming increasingly concerned about the consolidation of media and their apparent ability to deliver a biased agenda to the public airwaves. A prime example is Sinclair Broadcasting, who is apparently forcing their stations to air an anti-Kerry documentary days before the election. Obviously they are using the public airwaves that are granted by us, to serve their own political purposes, and not serve the public interest as obligated by law.

This type of behavior should be taken into consideration when Sinclair Broadcasting stations come up for licence renewal. They certainly are entitled to free speech but not to use the public airwaves to do it.

Thank you.
